

This proposed action is ridiculous. Where do most of the problems with obscenity occur? In the top 25, 50, or even 100 markets. In a market the size of Rapid City, we don't air any offensive material because we know our audience we stand for it and we worry about losing advertisers. This measure would really hurt the small town broadcaster. The equipment and time to operate it would be another drain on a group of broadcasters that struggles daily to make it. We do NOT need this.
